BRAINS Training and Review Corporation

The knowledge that matters...

*from a program that suits
your needs...*

Welcome to BRAINS, the only review provider that gives you a choice of UPCAT review programs to meet your specific relearning need.

Maybe you want a faster pace, covering more ground in a shorter time, and do some studying on your own. Maybe you want to take your time to master the details, have more practice, make sure you didn't miss a thing. Whichever you need, we have the program for you.

BRAINS UPCAT Review comes in two programs with the same complete review coverage and taught by same-caliber faculty. The difference is in the instructional design. The Classic Program, at 75 hours, is for the confident or nearly confident student who needs less teaching and training to prepare for the exams. The Cram Class, at at least 150 hours, is for students who want to leave no stone unturned and are willing to work extra hard for test preparation. Unlike Q&A-based reviews, both BRAINS programs are lecture-based, teaching the knowledge and skills that need to be learned or relearned, before drills and discussion train you for testmanship.

Our programs register 25-50% admission rates to UP, not counting admissions to other top universities. Considering the diverse backgrounds of our students, these numbers make us proud.
