

BRAINS NMAT REVIEW

(since 1986)

— the first, the best NMAT Review in the country!

Choose the program that fits you best, for the highest NMAT score you can get.

PREMIER EDITION

The gold standard of NMAT review programs. Limited, but never quite duplicated by competition. Complete, intensive, and appropriately paced for premed majors and those who have taken courses in *Chemistry and Physics*. Best choice for premed students, especially those of junior standing and seniors who take no chances in their quest for a slot in a top medical school.

SHORT COURSE

For highly motivated, high performing, and confident premed students with strong backgrounds in the science and math courses. Fast-paced lectures that cover all subject areas make it ideal for students who might be too busy for a long and detailed review. Students must be motivated to study on their own to catch up with the pacing of this program.

SPECIAL EDITION

For non-premed majors who have not taken the required premed science courses (Biology, Chemistry and Physics), this program is appropriately paced to give reviewees enough time to absorb foundation concepts and processes before proceeding to the preview of higher subjects. Ideal for Nursing majors and those in the AB or BA (Bachelor of Arts) courses.

OPENING THIS YEAR:

INTERNATIONAL AND GRADUATE EDITION

Visit our website for details.
